Art Unit: 2665

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, drawn to method for voice packet communication in mobile communication system, classified in class 370, subclass 349.
  - II. Claims 19-26, drawn to system and method for transmitting data frame with error recovery scheme utilizing encoder and framer, classified in class 714, subclass 776.

The inventions are distinct, each from the other because of the following reasons:

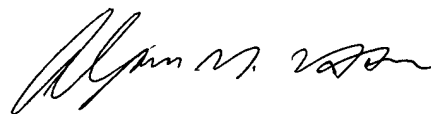

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as data encoder with error correction capability. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete **must** include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
